

# SAAFMedia 106

## Product Overview

SAAFMedia 106 is a mixture of activated carbon, impregnated activated carbon, and impregnated activated alumina, utilising physisorption and chemisorption to efficiently remove gaseous contaminants from airstreams.

## Key Features

### Unique Composition

Contains activated carbon, impregnated activated carbon, and impregnated activated alumina

### Broad Gas Removal

Removes a wide range of gases through physisorption and chemisorption

### Versatile Application

Ideal for both commercial and industrial settings

## Typical Properties

<b>Media</b>	Activated Carbon, Impregnated Activated Carbon, Impregnated Activated Alumina	<b>Shape</b>	Cylindrical Pellet, Spherical Pellet
		<b>Target Gas</b>	VOC, Acid, Oxidisable Gases

## Application Guidelines

<b>Maximum Temperature</b>	10°C to 51°C
<b>Maximum Relative Humidity</b>	40% - 70%, Non-Condensing
